Professional Bio:

Aaron is a technical advisor and program management leader with over 15 years of international experience advancing climate resilience, sustainable development, and environmental and social performance. He specializes in integrating ESG compliance, biodiversity conservation, and sustainable

Skills & Expertise:

Agriculture & Food Security, Program/Project Management, Climate & Resilience, Stakeholder Engagement, Infrastructure / Energy

Sectors of Work:

International Development, Climate & Environment, Economic Growth, Emergency Relief

livelihoods into complex, multi-sectoral programs across Sub-Saharan Africa.

His background includes leading diverse teams and delivering results in agriculture value chains, natural resource management, rural infrastructure, food security, and climate adaptation initiatives. He has worked extensively in West Africa, building trusted partnerships with governments, development institutions, private sector actors, and local communities to ensure sustainable, inclusive outcomes.

He brings technical expertise in environmental and social risk management, ESG standards, climate adaptation, and nature-based solutions. He is passionate about protecting biodiversity, advancing wildlife and landscape conservation, and embedding environmental priorities into development programs that create long-term benefits for both people and ecosystems.

Throughout his career, he has focused on building high-performing teams, fostering partnerships, and applying practical, innovative approaches to help organizations achieve measurable impact in conservation, climate action, and sustainable development.
